OBJECTIVE

Seeking an opportunity to utilize my programming, management, and business skills to develop high-quality software.

EXPERIENCE

Attard Consulting, **Software Developer** — Feb 2017-Present

- Developed projects for a variety of clients including membership sites, eCommerce solutions, onboard software, and internal company systems.
- Created custom database designs to accommodate unique use cases and business goals.
- Implemented security protocols to secure customer information and purchase data.
- Used numerous technologies including Angular, React, Mongo, MySQL, and more.
- Increased client sales by 100% after deploying a new website and shopping cart system.

Thermo Fisher Scientific, **Web Developer** — Jan 2018-Nov 2018

- Lead developer on WRC, a project management tool used by the Fortune 500 company.
- Moved the application to the cloud (AWS) to ensure reliability and streamline development.
- Modernized the system by integrating JavaScript libraries into a legacy PHP codebase.
- Built a myriad of features like file upload, user authentication, and a messaging system.

Locbit Inc., **Software Engineer** — Feb 2016-Feb 2017

- Developed IoT software in partnership with Panasonic.
- Created network visualization maps using JavaScript.
- Parsed an archive of business transactions into a MySQL relational database to analyze trends, using Python.

SmartProperty, **Software Developer & Project Manager** — Nov 2014-Feb 2016

- Full stack developer using LAMP, PHP, MySQL, Git, jQuery & JavaScript
- Managed development of SaaS software with Scrum/Agile.
- Conducted product testing, bug fixing, and quality assurance.

The Beast Brief, **Software Developer & Marketing Analyst** — Jan 2013-Nov 2014

- Developed thebeastbrief.com using a LAMP stack.
- Improved user experience through A/B testing.
- Coordinated an international team of developers, writers, and marketers.

SKILLS

- JavaScript \ React \ Angular \ Vue \ Redux \ AWS Certified \ Python \ Node \ Laravel \ PHP
- APIs \ REST \ SOAP \ HTML5 \ CSS3 \ Sass \ Bootstrap \ LAMP \ Ruby \ MEAN \ Flask \ jQuery
- Git \ Cloud Servers \ Unit Testing \ A/B Testing \ Databases \ SQL \ Shell \ Unix/Linux \ MVC
- Full Stack \ Project Management \ TDD \ OOP \ Agile \ SCRUM \ Web Development \ UI/UX

PROJECTS

Web Request Central   Jul 2018

- Led development of project management tool used to optimize workflows of website content.
- Streamlined processes for designers, content writers, project managers, and stakeholders.
- Migrated legacy servers to AWS cloud infrastructure and built APIs to access data.
- Utilized JavaScript, Vue.js, PHP, MySQL, Oracle, AJAX & other technologies.
- The app is used around the world by this Fortune 500 company.

Att Business System   May 2017

- Created web app to allow for easy invoicing, inventory tracking, accurate accounting, and in-depth analysis of vital business data.
- Built with Laravel (PHP), MySQL, jQuery & JavaScript.
- Designed/deployed infrastructure on an AWS Linux instance.
- Sufficient inventory level rates improved from 85% to 99%.

Filtracker   Jan 2017

- Developed project to streamline operations of industrial-scale 3D printing.
- Implemented material tracking and print status with Python, RaspberryPi, and computer vision library, OpenCV.
- Improved output by 40% as operators could monitor the printers in a unified dashboard.

EDUCATION

Udacity, San Francisco, CA   2018
Full Stack Web Developer Nanodegree Program

Treehouse, Portland, OR   2014-2017
Comprehensive Courses in Computer Science

San Diego State University, San Diego, CA   December 2013
B.S. Business Administration
